

SERVICE AGREEMENT — ROASTERY OS FOR S&W CRAFT ROASTING

DRAFT — for discussion. Have an attorney review before signing.

This agreement is between **Ogami Systems** ("Ogami") and **S&W Craft Roasting** ("Nick"), dated _____.

1. What Ogami is building

One system with two sides, as shown in the working demo:

The Storefront (customer side)

- Drop page connected to your Square account
- Inventory that counts down live and can never oversell — sold out means the buy button turns off instantly
- Per-customer bag caps (default 2 per coffee)
- Waitlist signup, and wave announcements: scheduled texts that release the drop to your list in groups instead of all at once

Drop Control (your side)

- The daily roast sheet: orders are automatically added up, divided into 21-bag roasts, and scheduled onto roast days (max 24 roasts/day, adjustable to your real number)
- Drop manager: set the drop, the quantities, the caps, the waves
- Fulfillment: pick lists in roast order, thermal labels pre-printed with the declared roast date, postage purchased in one click
- Customer and waitlist lists

Launch package: setup of your Square connection, importing your customer list and waitlists, your label printer configured, and a working session where we run your first drop together.

Not included in this agreement: the AI inbox assistant (drafted replies to customer texts/emails). That is a Phase 3 add-on we can price separately once the system above is running.

2. What it costs, and what each dollar pays for

One-time build fee: \$8,900

This pays for the construction — the work that happens once:

WHAT	WHY IT COSTS MONEY
Storefront + oversell-proof inventory	The core engineering: the stock ledger that makes overselling impossible
Wave text system	Waitlist database + scheduled SMS releases
Roast Brain + daily sheet	The scheduler that turns orders into your to-do list
Labels + postage	Printer integration, date-stamped label templates, shipping accounts
Setup, data import, training	Getting <i>your</i> coffee, customers, and printer into it — and you comfortable with it

Monthly service fee: \$275/month (starts at launch)

This pays for keeping it alive — the costs that never stop:

WHAT	WHY IT'S MONTHLY
Hosting + database	The servers your store and sheet run on, with nightly backups
Text messages	Up to 2,500 texts/month included (waves, tracking, alerts); beyond that, billed at \$0.02/text
Monitoring	We're watching drop mornings so a crash never costs you a drop
Security + updates	Square, shipping, and SMS providers change things; we keep up so you don't
Support	Questions answered, small fixes made, within 1 business day

Postage itself (the actual USPS cost per package) is paid by S&W at cost — it is your shipping expense, not a fee.

3. Payment options

Option A — Pay in full: \$8,900

- \$4,450 to begin work
- \$4,450 at launch (when your first live drop runs on the system)

Option B — Payment plan: \$9,400 total

- \$3,000 to begin work

- 4 monthly payments of \$1,600
- The \$500 difference is the cost of the plan itself — no interest, no credit check, nothing hidden.

The \$275/month service fee is separate and begins at launch under either option.

4. Late payment and suspension

If any payment — build installment or monthly service fee — is **30 days past due**, Ogami may **suspend the system** (storefront, texts, roast sheet, and labels go offline) until the account is brought current.

- Your data (customers, orders, waitlists) is **never deleted** during suspension. It is preserved for at least 90 days.
- Service is reinstated within 1 business day of the account being brought current. No reinstatement fee.
- Under Option B, the system is licensed, not owned, until the build fee is fully paid.

5. Term and cancellation

- The monthly service continues month-to-month after launch. Either party may cancel with **30 days written notice**.
- On cancellation, Ogami provides a complete export of your data (customers, orders, waitlists) in a standard format within 14 days. Your data is yours.
- Ogami retains ownership of the software platform. S&W owns all of its business data, customer relationships, and content.

6. Timeline and changes

- Target: live within **6–8 weeks** of the first payment, assuming timely access to your Square account and label printer.
- The scope in Section 1 is fixed. New features beyond it (including the Phase 3 inbox assistant) are quoted and agreed in writing before any work or billing.

7. The honest fine print

- Ogami will build and operate the system with reasonable skill and care, and will fix defects in the delivered scope at no charge.
- Ogami is not liable for losses caused by third-party outages (Square, SMS carriers, USPS) but will work to restore service promptly.
- Total liability under this agreement is capped at the amounts paid in the prior 12 months.
